Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 16 and 20-29, drawn to audio system for adjusting gain, classified in class 381, subclass 104.
 - II. Claims 17 - 19, drawn to computer program product, classified in class 700, subclass 94.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (Group I) as claimed regarding audio system for adjusting gain does not require the particulars of the subcombination of the computer program product as in group II. The subcombination has separate utility because the audio system for adjusting gain can use any computer program product to determine a gain adjust signal based on a person-microphone position.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
